FULL PLATE · RESTAURANT MANAGER GAME

Round 11 report

Red-team fixes, what the game looks like now, and how it compares with the restaurant games on the market

Prepared for Daniel · 10 November 2026 · Game version 11 (commit `03759df`)

39 / 43
red-team findings closed; 4 partly; 0 open

1,231
automated tests passing (was 1,071)

0
known security advisories in dependencies (was 18)

12 / 20
Stars games reaching a dynasty by year 10 (was 3 / 20)

Contents — 1. The short version · 2. What changed in Round 11 · 3. Every finding and its status · 4. The numbers · 5. In pictures · 6. How Full Plate compares with other games · 7. Ideas worth borrowing · 8. What's next · Sources

1. The short version

Last round, a red-team review of the code and the game found 43 problems: ways a bad save file could crash the game on every device, ways a child could lose quietly and have her restaurant deleted, end-games that were unwinnable or exploitable, and a layout that broke on an iPad held upright. Round 11 fixed them. Five builders worked in parallel, one per area, then a reviewer merged their work, re-ran every one of the red team's own reproductions, and checked the game balance, size and playability.

> **The result:** 39 of the 43 findings are closed, with the red team's own attack scripts now failing to do any harm. The remaining 4 are partly fixed and listed on page 4. Game balance is identical to before, row for row. The game is published as version 11 and pushed to GitHub.

What a parent will notice

- **She can't lose her restaurant by accident any more.** A header chip counts down "Bank: N days left"; an evening card explains what to do; a lost game is kept in "Your games" with a *Start over with the same restaurant* button instead of being deleted.
- **No more spending into a hole.** Big purchases ask "This leaves you with £630 — are you sure?" and anything she can't afford is greyed out with the reason shown. On the easiest setting a first chef can always be hired, and on the others the bank will lend a first wage once.
- **It works on an iPad held upright** (768×1024) as well as sideways, with no sideways scrolling on any screen.
- **Plainer words.** "86'd" became "Take off tonight", "HQ" became "head office", "royalty" became "a share of their takings", "VAT/HMRC" became "tax / the tax office", and so on. Pressing ? opens "What the words mean".
- **"No grown-up drinks" is on by default.** Lager becomes tall fizzy lemonade, prosecco becomes fizzy apple; the game plays identically either way.
- **Less waiting.** "Skip to evening" during service, the game remembers her speed, and the easiest setting starts at 4×. Day 30 now takes about 23 minutes of play instead of 52. Reloading mid-shift puts her straight back into the kitchen.
- **Nothing from outside can break it.** Every save file is checked before it's trusted; a damaged one is refused with "That save file is damaged." rather than white-screening the game.

How it compares (section 6)

Two analysts surveyed 40-odd games. For a parent, Full Plate wins on every safety point: no ads, no purchases, no chat, no loot boxes, drinks hidden, nothing random, no tracking. For depth it sits nearer the grown-up PC sims (Restaurant Empire II, Recipe for Disaster) than the Roblox and phone games, and it's the only game surveyed with two endings, franchising and an employee start. Where it's behind is *fun for a child*: it opens on planning screens, service is quiet, customers are types rather than characters, and there's no collection screen. Section 7 lists ten borrowable ideas, costed; the three cheapest (sound and animation during service, a "My collection" book, named regular customers) would close most of that gap.

One thing only you can do

The free public web address (lettfolio.github.io/full-plate) still needs GitHub Pages switched on: repository **Settings → Pages → Source: "GitHub Actions"**. The build pipeline is ready and now runs with minimal permissions. Until then the game lives at the private Claude link.

2. What changed in Round 11

The work was split into five areas so the builders wouldn't collide, in the order the red-team report recommended.

A · Loading and saving can't be broken from outside

- Every save (owner, career, Empire, Stars) is checked field by field before it's trusted. Numbers must be real and in range, lists are capped, unknown fields dropped. A crafted file is refused with "That save file is damaged."
- Files over 5 MB are refused before being read; a "gzip bomb" (a tiny file that inflates to 256 MB) is refused in 0.3 seconds using 1 MB of memory (it used to take 13.6 s and 252 MB).
- A new error page catches anything that still crashes and offers *Back to title* and *Delete this game*, so no bad save can brick every device.
- A 300 kB restaurant name is cut to 40 characters. If one game can't sync to the account, only that game stops syncing; the others carry on.
- Games are tagged with the account they belong to: another account's games are hidden, never pushed and never deleted. Backups are capped at two per game and leftover fragments are cleaned up.
- The fuzzer found and fixed one real bug: the rota accepted an empty 7-slot array and saved blanks.

B · Losing is visible and recoverable

- Bank countdown chip in the header, an evening card with one-tap fixes ("Raise prices 10%", links to Stock and Rota, "Borrow £X"), and a morning banner on the last three days.
- Game over no longer deletes anything. The slot shows "Lost — day 93" with *Start over with the same restaurant* and *What happened*.
- A spend that would leave fewer than three days of running costs asks first. The red team's "decor spree" test used to end at £25 with no warning; it now stops at £1,130 with a chef still affordable.
- Disabled buttons say why ("Needs £450 in the bank — you have £120"). On Cosy, the hire fee can go into the overdraft; on Normal/Hard a one-off starter loan is offered.
- A "starter chef" (begin with one chef hired) was built and tested, but left **off**: it made two play styles slightly worse in the 200-seed balance runs.

C · The two end-games work

- In the Empire, a shop you're running hands-on can no longer bankrupt the whole company: head office tops up the till each evening. If head office can't, you're offered "Close this shop and move on" rather than game over. The free £20,000 float exploit is gone, and franchised shops can't be run hands-on (which was double-counting their money).
- A bankrupt Empire gets its own screen with "Try again from the last board meeting". When head office is sinking, the board asks a single clear question: sell a shop, close it, or hold on.
- Parked shops are stored compactly: a 10-shop save fell from 16.5 MB to 0.6 MB.
- Stars: keeping a star is now a little easier than earning it, and the head chef who wants to leave can be kept with a pay rise and a share. Dynasties by year 10 went from 3/20 to 12/20. The "close at the top" ending now needs three stars on two guides in a row. "Michelin" is now "Golden Plate" everywhere.

D · Tablet and child fit

- Portrait iPad layout, plain-words pass (table on page 2 of the notes; key ones listed in section 1), "No grown-up drinks" setting, "?" words dialog, skip links and 49 fewer keyboard stops, "Skip to evening", remembered speed, mid-shift autosave and resume, "Tap" instead of "Click" on touch screens, a filtered Stock tab, one consistent money formatter.

E · Pipeline and honesty of the tests

- The GitHub build grants itself nothing by default; each step gets only the permission it needs; every third-party action is pinned to an exact commit; Dependabot checks monthly.
- Dependencies upgraded: 18 known advisories (3 critical) → 0. Vitest 4 exposed four slow tests that had been quietly over their time limit.
- The accessibility probe now lives in the repo with a baseline it must not exceed; two tests that had been "fixed" by picking lucky seeds now assert across 16–30 seeds. A corpus of 29 real saves is committed and must always load.
- The font licence ships with the game; a README and a rewritten architecture document; the 1,217-line canvas renderer split into six modules with pixel-identical output.

3. Every finding and its status

Ids match `docs/RED-TEAM.md`. "Closed" means the red team's own reproduction was re-run on the merged build and no longer causes harm.

Id	Finding (short)	Status	Evidence
S1	Object-typed name in a save white-screens every device	**Closed**	Crafted file refused; CrashGuard page as backstop
S2	300 kB name breaks cloud sync for all games	**Closed**	Name capped at 40 chars; per-slot stall only
S3	No schema validation on any save type	**Closed**	Validators in all four sims; string day, 100k staff, bogus phase all refused
S4	Gzip bomb / size caps	**Closed**	256 MiB bomb refused in 0.3 s, +1 MiB memory
S5	Account hygiene on a shared device	**Closed**	Second account sees 0 of the first's games
S6	Imports stored verbatim; unbounded backups; orphan chunks	**Closed**	Re-serialised on import; ≤2 backups; orphans 9 → 0
S7	CI permissions at workflow level	**Closed**	Default `permissions: {}`; per-job grants
S8	Actions pinned by tag	**Closed**	All six pinned to commit SHAs; Dependabot
S9	Vulnerable dependencies; `--host` by default	**Closed**	18 advisories → 0; Vite 6, Vitest 4
S10	Forged header reads 400k chunks	**Closed**	Chunk count ≤ 8 and must match; 1 read
S11	Stale header after failed write	**Closed**	Header re-read before next push (by design; never reproducible)
S12	Bidi/control characters; dev switches; no CSP	**Partly**	Characters stripped, `?autopilot`/`?perf` dev-gated; no CSP yet, Pages origin shared
S13	Font licence not shipped	**Closed**	OFL.txt shipped; credit in Settings

G1	Hands-on shop bust deletes a running Empire	**Closed**	Head office top-up; bust save runs 120 more days
G2	Cosy staffless £0 trap	**Closed**	Hire fee into overdraft; starter loan; nohire run shows warnings
G3	Stars dynasty near-unwinnable	**Closed**	3/20 → 12/20 by year 10; 1/10 → 7/10 from fork
G4	El Bulli ending too easy	**Closed**	Needs ★★★ on two guides
G5	Franchise counted twice	**Closed**	Hands-on hidden and refused on franchised shops
G6	Free £20k till float	**Closed**	Head office pays a week's float + food; refunded on leaving
G7	Parked-site save bloat	**Closed**	10 shops 16.5 MB → 0.58 MB
G8	Bankruptcy freezes the Empire	**Closed**	EmpireEnd screen; board debt question; sinking card
G9	Prototype-key commands	**Closed**	`__proto__`/`toString` rejected in all dispatchers
G10	NaN Empire arguments; autosave throws	**Closed**	Refused; "Couldn't save" indicator
G11	Stars unknown satellite kinds / NaN	**Closed**	Refused; 5-satellite cap respected
G12	Fork without being offered	**Closed**	Allowed once, from day 365, never over an existing path
G13	Duplicate HIRE ids	**Closed**	Refused
G14	Campaign/transfer/refund micro-exploits; owner profile from UI	**Partly**	All closed in the game; the sim's raw API still accepts SET_OWNER_PROFILE
U1	Portrait 768×1024 broken	**Closed**	38 scrolling screens → 0; no tap < 44 px; no text < 13 px
U2	Day-1 decor spree to £25	**Closed**	Spree now ends at £1,130 after a confirm
U3	Silent losing; game over deletes the save	**Closed**	Countdown chip, card, banner; archive + restart
U4	Stale toasts / wrong-panel hints	**Closed**	Cleared on phase change; wording fixed
U5	Star/Dog label on day 1	**Closed**	"New: judged after 7 days of sales"
U6	Hidden "needs £X" reason	**Closed**	Visible text; unaffordable options greyed
U7	Trade words on key screens	**Closed**	Word list applied; key-screen test fails on any left (see note on page 8)
U8	Alcohol in a child's game	**Closed**	"No grown-up drinks" on by default; identical play either way
U9	156 keyboard tab stops	**Closed**	107 stops; Tab, Enter reaches Open for service
U10	First year too long for a child	**Partly**	Skip, speed memory, 4× on Cosy; year 1 still ≈ 4.7–6 h
U11	Reload mid-shift loses the shift	**Closed**	Resumes "from 14:00" after reload
U12	Mixed signals (mood reasons, Michelin, Tap/Click, etc.)	**Closed**	All items done
T1	Probe over-reported	**Closed**	Probe in repo with honest baseline

T2	Tests re-seeded to pass	**Closed**	Assert over 16–30 seeds
T3	No save corpus	**Closed**	29 saves committed; all load
T4	Docs out of date	**Closed**	README, ARCHITECTURE, PIPELINE

4. The numbers

Balance — unchanged

Survival rate after one game year, 200 random restaurants each, for seven scripted play styles. Every row is identical to the previous build because none of the new rules touch a well-run restaurant.

Play style	Before (Round 10)	After (Round 11)	What it is
typical	90.0%	90.0%	sensible menu, hires when told
balanced	98.5%	98.5%	follows every goal
cheap	68.0%	68.0%	lowest prices, cheapest staff
premium	99.0%	99.0%	high prices, best staff
nohire	0%	0% (now with warnings)	never hires anyone
learner	98.0%	98.0%	mistakes, then corrects
decorator	88.0%	88.0%	spends on decor first

Stars dynasty (10 years)

Run	Before	After
Cold start, 20 seeds, by year 10	3/20	**12/20**
… by year 12	3/20	16/20
From the fork, 10 seeds, by year 10	1/10	**7/10**
Stars lost on guide days (cold)	22	0

Empire (10 years, 5 seeds × 3 chains)

Run	Before	After
Following the board's advice	15/15	15/15 (same years)
Skipping board meetings	13/15	13/15

Size and speed

Measure	Before	After
Main code chunk (budget 200 kB)	195.9 kB	194.9 kB
Dependency advisories	18 (3 critical)	0
Automated tests	1,071	1,231
Gzip-bomb refusal	13.6 s, +252 MB	0.3 s, +1 MB
10-shop Empire save	16.5 MB	0.58 MB
Keyboard stops, day-1 Menu	156	107
Minutes to day 30 (est.)	≈ 52	≈ 23 with Skip

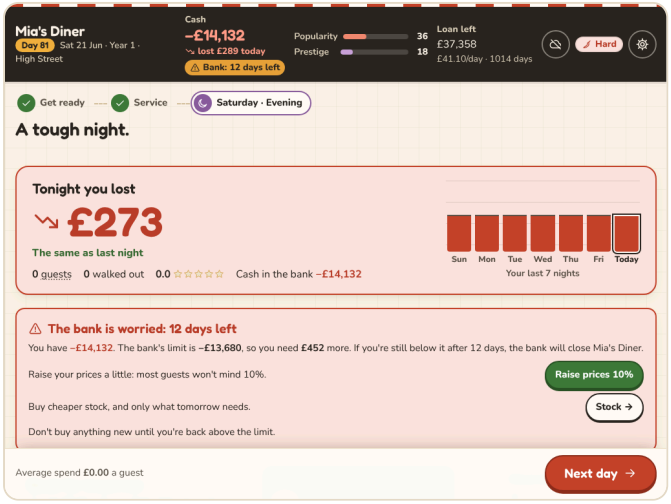

Accessibility probe (39 screens)

Measure	Before	After
Screens scrolling sideways at 768×1024	38	**0**
Text under 13 px (6 sizes × 117 screens)	0	0
Buttons/switches under 44 px	0	0
Tappable glossary words under 44 px	≈ 290	≈ 290 (see page 8)

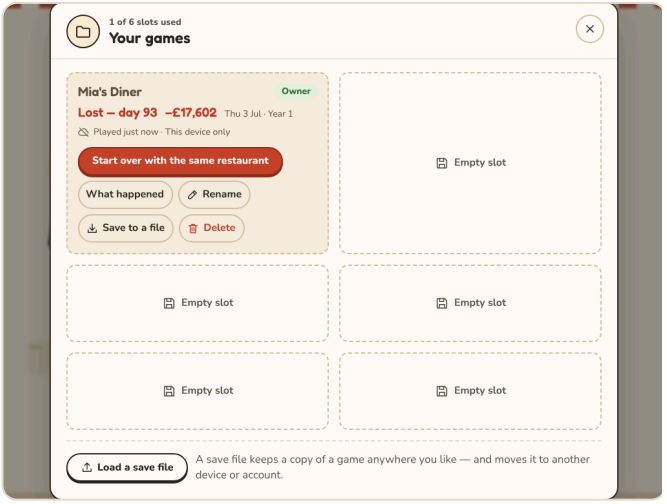

Browser playtests on the published build

All with zero page errors, at 1024×768 and 768×1024 with touch: a new player to day 3; an owner for 7 days with a decor spree and no-hire warnings through to "Lost — day 93" and a restart; the red team's bust-at-flagship Empire save (now topped up) and broke-head-office save (now "Close this shop and move on"); a Stars game; a win; four crafted save files (all refused); a mid-shift reload (resumed); keyboard-only play to "Open for service".

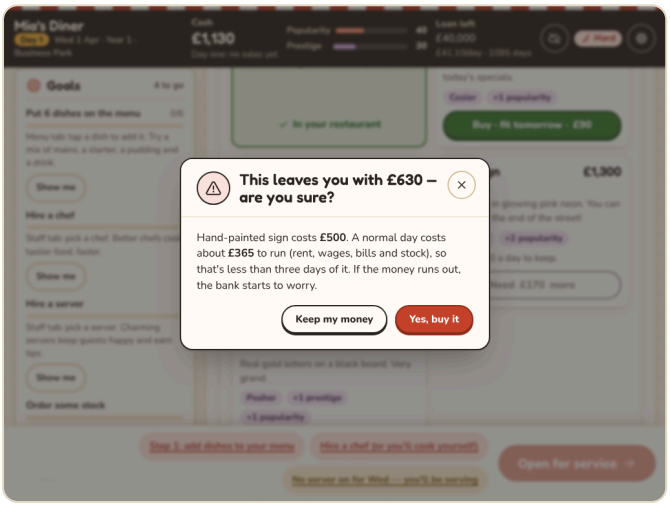

5. In pictures

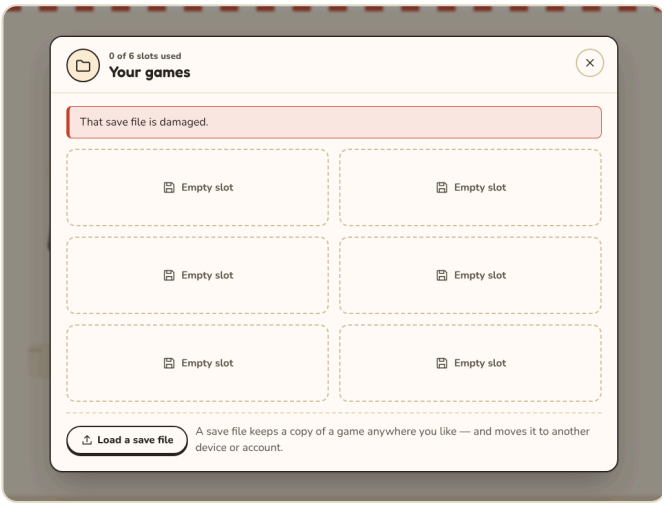

Losing is visible now. Header chip "Bank: 12 days left", the night's loss, and a card that says exactly what the limit is, what she needs, and three things to do about it.

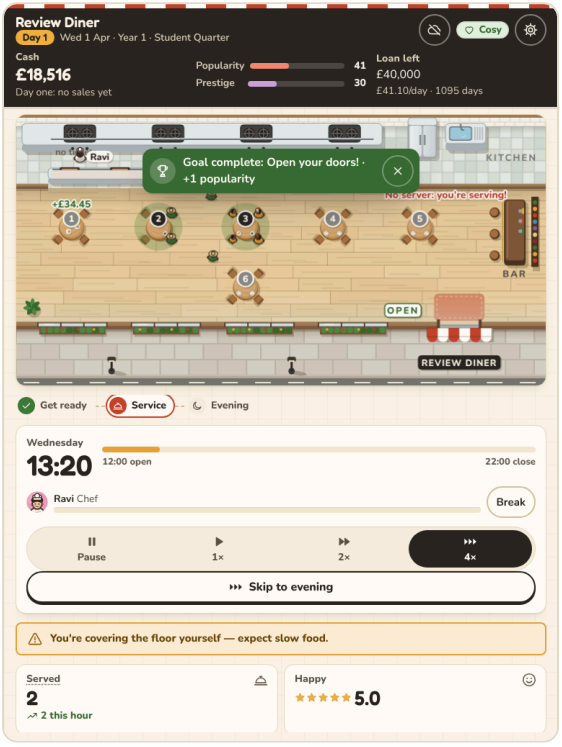

Nothing is deleted. A lost game stays in Your games as "Lost — day 93" with *Start over with the same restaurant* and *What happened*.

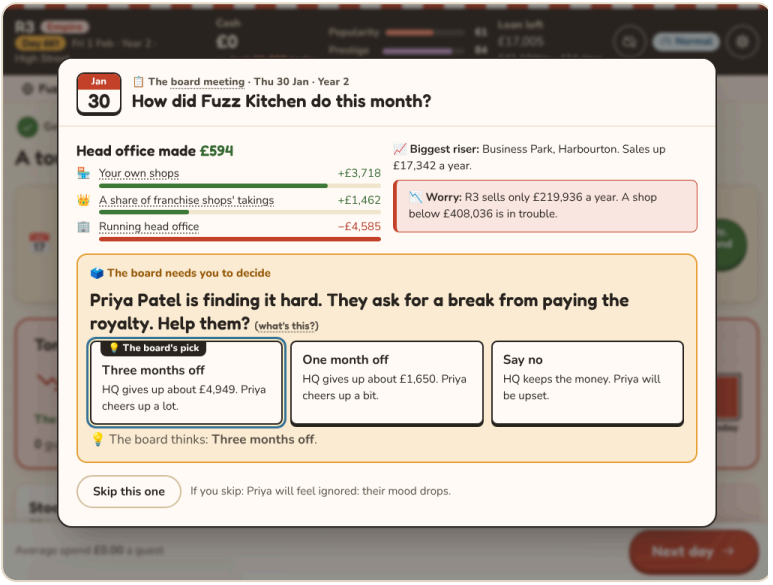

Spending asks first. "This leaves you with £630 — are you sure?" with the cost of a normal day for scale. The red team's spree used to end at £25.

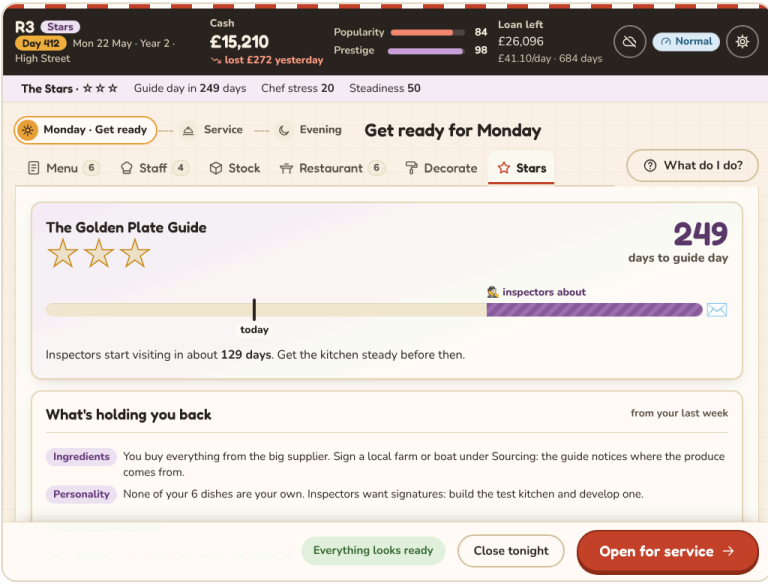

Bad files are refused, not loaded. The red team's crashing file now gets "That save file is damaged." and nothing else happens.

iPad held upright (768×1024). The floor sits above the panel, with "Skip to evening" and speed buttons; no sideways scrolling.

The board meeting, with "head office" wording and plain explanations of each choice. (Note: "royalty" and "HQ" still appear in some board option text — listed on page 8.)

The Golden Plate Guide (formerly "Michelin") with the countdown to guide day and what's holding the restaurant back.

6. How Full Plate compares with other games

Two analysts surveyed the market on 10 November 2026: one the management/tycoon games, the other the games 10-year-olds actually play. Every fact below about another game comes from a page they fetched (Sources at the end); anything they couldn't confirm is marked *unverified*. Prices are UK where a UK shop confirmed them.

6.1 The games a 10-year-old plays

Game	Where	Price	Age advice	Money model	In one line
Full Plate	Browser, tablet or PC	Free	Written for a child reader	None	Plan the day, watch or work the service, read the results; two ways to win
Overcooked! 2 / All You Can Eat	Switch, Switch 2, PlayStation, Xbox, PC	£8.67–£29.99	PEGI 3; Common Sense 8+	Paid; DLC	Up to four chefs cook against the clock in silly kitchens
Papa's games (To Go / Deluxe)	Phone, tablet, PC	£0.99–£4.99	Apple 4+	Paid once, no IAP	Build each order across stations; customers level up
Cooking Fever	Phone, tablet	Free	Apple 9+; Common Sense 10+	Ads, IAP to £26.49, loot boxes	Tap-and-slide cooking; "wait or pay real money"
Good Pizza, Great Pizza	Phone, tablet, Switch, PC	Free (ads/gems); Switch £7.49; ad-free on Apple Arcade	Apple 4+; Common Sense 5+	Ads, gems	Make what 80+ funny customers ask for; beat a rival
Toca Boca World / Toca Kitchen 2	Phone, tablet	Free + packs £0.79–£3.99 / subscription	Apple 4+	IAP / subscription	Open dolls'-house play; cook anything, watch reactions
Roblox: Restaurant Tycoon 2	Roblox (any device)	Free	Roblox PEGI 7; Common Sense 13+	Robux: 11 passes, 41 extras	Build, decorate, cook; 1.7 bn visits — what her friends play
Cooking Mama: Cuisine!	Apple Arcade	£6.99/month	Apple 4+	None (subscription)	Swipe-and-tap steps, stars per step, recipe book
Disney Dreamlight Valley (Chez Remy)	Switch, PlayStation, Xbox, PC	≈ US$39.99	ESRB E; Common Sense 5+	Paid + cosmetics	Life sim; cooking raises friendship with Disney characters
Diner DASH Adventures	Phone, tablet	Free	Apple **13+**; Common Sense 11+	Ads, IAP, loot boxes	Seat and serve in timed levels; "harshly pushes players to spend"

6.2 The parent's checklist

	Full Plate	Overcooked 2	Papa's	Cooking Fever	Good Pizza	Toca Boca	Roblox RT2	Dreamlight
Ads	**None**	None	None	**Yes**	**Optional**	None	**Roblox ads (unverified)**	None
Purchases	**None**	**DLC**	None	**To £26.49 + loot boxes**	**Gems**	**Packs**	**Robux**	**Cosmetics**
Chat / strangers	**None**	Emotes only	None	None	None	None	**Yes (age-checked)**	**Online 2–4**
Alcohol	**Hidden by default**	None	—	None	None	None	**User content**	None
Tablet, touch	**Both orientations, 44 px targets**	**No**	Yes	Yes	Yes	Yes	Yes	**No**
Saves follow her	**6 slots, any device, file export**	Console	Device	**Lost progress reported**	Device	**Unreliable restores reported**	Roblox account	Console
Tracking	**None (0 third-party requests)**	—	—	**Advertising data**	—	**Marketing data**	—	—
Session length †	10–15 min a game week; 3-min shift	Short levels	A few minutes a day	Short levels	Day by day	Any	Open-ended	Long
Reading †	Reading age 7–9, tips on tap, Bigger text	Very little	Little	Little	Customer lines	Almost none	Light + chat	Moderate

† analyst's assessment rather than a sourced fact.

6.3 The management games (for depth)

Game	Platforms	Price	Rating	Depth (1–5) †	Hands-on cooking	End-game
Full Plate	Browser (tablet, PC)	Free	Child-readable	4	Yes (optional shift)	Two: worldwide Empire or a Golden Plate group
Restaurant Empire II (2009)	Windows	£16.75	None listed	4	No	Two campaigns of 34 missions
Recipe for Disaster (2022)	Windows	US$14.99	None listed	4	No	Turn-round scenarios + freeplay
Chef: A Restaurant Tycoon (2020)	Windows	US$19.99	None listed	3	No	Story challenges; sandbox

Tavern Keeper (Early Access 2025)	Windows	US$29.99	"Family friendly" tag	4	No	Storybook campaign
PlateUp! (2022)	Windows, Switch	£16.75	PEGI 3	3	Yes	Runs that end on failure
Chef Life (2023)	Switch, PC, PlayStation	unverified	PEGI 3, "In-game purchases"; ESRB "Alcohol reference"	3	Yes	A Michelin star
Cook, Serve, Delicious! 3 (2020)	PC, Mac	£15.49	None listed	2	Yes	Road trip of 387 levels
Big Ambitions (1.0 Aug 2026)	PC, Mac	US$25.99	None listed	5 (whole city)	unverified	unverified

† the analyst's judgement from store-page features, not a published score. Most PC-only Steam games carry no PEGI/ESRB rating at all.

6.4 Feature by feature

Feature	Full Plate	Best in class	Verdict
Menu and pricing	Menu, prices, dishes sorted by popularity × profit	Restaurant Empire II: 600+ recipes; Chef and Recipe for Disaster: recipe editors	**Behind on inventing dishes**
Staff	Named people with traits, likes, friendships, moods explained, training, rota	Recipe for Disaster: traits, stamina, walk-outs (adult tone)	**Ahead, in words a child can read**
Money	Loan, rent, wages, bank countdown, bankruptcy (not on Cosy), starter loan	Most rivals: "avoid ruin" or cash only	**Ahead**
Decor	9 slots, 45 items, wear and refresh	Restaurant Empire II: 1,400 items; Tavern Keeper: free placement and a workshop	**Behind — the most visible gap for a child who loves decorating**
Growing	Franchising across 12 cities, or a capped Stars group	Restaurant Empire II: four cities; nobody models franchising	**Ahead; unique**
Reputation	Popularity and prestige, reviews, hidden inspectors	Restaurant Tycoon 2: one star score built from four parts	**Accurate but abstract for a child**
Win condition	Two different endings	Only Restaurant Empire II and Chef Life have a clear end	**Ahead**
Employee start	Begin as a cook or waiter, work up to owning the place	None found	**Unique**
Saves	6 slots, any device, file export, offline copy	No store page claims cross-device saves	**Ahead**
Tablet	Both orientations, 44 px targets, 13 px minimum text	Every deep sim is Windows-only	**Ahead**

Characters and story	Customers are types; no mascot, no rival	Good Pizza: 80+ named customers and a rival; Tavern Keeper: ~100 stories	**Behind**
Fun in the first minute	Opens on planning screens	Papa's, Cooking Fever: food under her fingers in seconds	**Behind**
Feedback and "juice"	Once a day in the evening; quiet sounds	Cooking Mama: stars per step; Papa's: coins and reactions constantly	**Behind**
Collectables	71 dishes, 45 items, but no collection screen	Cooking Mama: recipe book; Papa's: unlock per rank	**Behind**
Playing together	Single-player	Overcooked, PlateUp!, Cooking Simulator 2: co-op	**Behind**
Time to the big choice	≈ 4.7–6 h to the year-1 fork (was 4.5–9)	PlateUp! runs and Good Pizza days are minutes long	**Better, still long**

6.5 What a parent would compare it to

Three things, probably. **Restaurant Tycoon 2 on Roblox**, because that's what children her age call "a restaurant game": free and lively, but it sells passes and items inside the game, has chat, and never ends. **Good Pizza, Great Pizza** on the iPad: gentle, funny and rated 4+, but with adverts and gems, and a business side that's mostly "earn enough to stay open". And, for a parent who plays sims, **Two Point** or a classic like **Restaurant Empire II**, next to which Full Plate looks smaller and plainer, with fewer things to place and fewer recipes. The fair summary: for depth of play it sits nearer the grown-up PC sims than the Roblox and phone games, it's safer than either on spending, chat and age rating, and it has less content and less sparkle than games that have had years and teams.

7. Ideas worth borrowing

Merged from both analysts, each tied to a named game, and costed. The deterministic simulation makes the "cheap" ones cheap: they're presentation, not rules.

#	Idea	From	Why it suits her	Cost
1	**More sound and animation during service**: a coin-pop per paid table, a cheer for a five-star review, music with its own volume, a "best night ever" sparkle. All off under reduced motion.	Papa's; Cooking Fever	Makes the watching part of the day feel alive. The cheapest way to raise "fun"; needs no change to the sim.	**Cheap**
2	**"My collection"**: one screen of every dish served well and every decor item owned, grey silhouettes for the rest.	Cooking Mama: Cuisine (recipe book); Animal Crossing	Completing a set is a strong pull at this age and rewards trying things rather than spending. The data already exists.	**Cheap**
3	**Regulars**: 15–20 named customers with a face, a favourite dish and a one-line opinion, who come back; a card that fills in as she serves them.	Papa's; Good Pizza (80+ customers)	Children remember people, not market segments. "Mrs Patel wants a curry!" is a reason to change the menu.	**Medium**
4	**A rival with a face** across the road, and a 30-second "Food News" card on Mondays. Cheeky, never cruel.	Good Pizza (Alicante; Pizza News Network)	Turns "popularity −3" into a story she can feel.	**Cheap**
5	**A star rating she can break down**: one 1–5 star score built from food, speed, cleanliness and happiness.	Restaurant Tycoon 2	What Roblox players already know; popularity/prestige stay underneath for the expert view.	**Cheap**
6	**Short "turn this place around" challenges**: 20-minute puzzles with one goal ("get to 4 stars by Friday").	Recipe for Disaster	Suits a child's play sessions far better than one long year; teaches one idea at a time.	**Medium**
7	**Assist settings for the hands-on shift**: slower orders, longer shift, skip a shift, dyslexia-friendly font.	Overcooked! All You Can Eat	Removes the "I'm bad at this" moment without taking the game away. A model families know.	**Cheap**
8	**Friendship hearts with staff**: praise, training or a favourite shift fills a meter; full meter unlocks a story moment or outfit.	Dreamlight Valley; Pokémon Café ReMix	Builds on the game's best asset, its staff, in a form read at a glance.	**Medium**
9	**Colour-your-own decor**: choose colour and pattern on the existing 45 items.	Tavern Keeper's workshop; Chef	Multiplies decorating choice without new artwork; self-expression is what this age asks for most.	**Medium**
10	**A test kitchen** with no money and no clock: cook anything, serve it, watch a silly reaction.	Toca Kitchen 2	A safe place to play when the business side gets too much.	**Medium**

11	**Seasonal days**: Pancake Day, Bonfire Night, Christmas, her birthday — a special ingredient, a decoration, busier tables.	Papa's Deluxe; Animal Crossing	A reason to come back on the real day, with nothing to buy.	**Medium**
12	**A food-truck first chapter** before the lease and loan.	Cook, Serve, Delicious! 3	A natural Cosy first week that's cheaper and quicker than a restaurant.	**Medium**
13	**Take a photo any time**, not just on the win screen.	Cooking Mama: Cookstar	Something to show friends and grandparents; the picture-card code exists.	**Cheap**
14	**Visit Dad's restaurant** (read-only) built on the account saves; later, a second player on the same device for the shift.	Restaurant Tycoon 2; Overcooked	Playing together is what she'll remember; the brief already asks for it.	**Expensive**

> **If only three get done:** 1 (juice), 2 (collection book) and 3 (regulars). Together they fix most of the "feels like a spreadsheet" gap at low cost. A good Round 12.

8. What's next, and what's still open

Still open after Round 11

- **U10 — the first year is still long** for a child (≈ 4.7–6 hours). "Skip to evening" helps; a first-year shortcut or the challenge format (idea 6) is the real fix.
- **Trade words in board options.** The word pass covered the screens the test checks, but the board meeting's option text still says "royalty" and "HQ gives up..." (visible on page 6). A small follow-up.
- **Glossary words are small tap targets.** Pressing a highlighted word shows its meaning, and those words are 17–30 px tall. They're no longer in the keyboard order, and no button or switch is under 44 px, but the probe still counts them. Either make them 44 px or stop counting them; a decision, not a bug.
- **S12 — no Content Security Policy** yet, and the GitHub Pages address shares an origin with any other project on that account. Low risk for a private family game; worth doing before sharing widely.
- **G14 — the sim's raw API** still accepts the owner-profile command; the game blocks it. Only matters to someone scripting the sim directly.
- **The probe and audit don't run in CI** (they need a browser on the runner). PIPELINE.md describes the extra job.
- "Try again from the last board meeting" is in memory only: after a reload the bankrupt-Empire screen offers "Start over" instead. Tested at unit level, not in a browser after reload.

Suggested order

1. **You:** switch on GitHub Pages (Settings → Pages → Source "GitHub Actions"), then open lettfolio.github.io/full-plate on her iPad. Or import the repo on Vercel if you'd rather (root `packages/game`, Vite).
2. **Her:** a playtest on the iPad, upright, on Cosy. Watch where she stops reading and what she taps first; that's the Round 12 brief.
3. **Round 12:** ideas 1, 2 and 3 above, plus the two small open items (board wording, glossary tap size).

Where everything is

- The game: the Claude artifact link (version 11), and GitHub `Lettfolio/full-plate` at commit `03759df`.
- Findings and status: `docs/RED-TEAM.md` (also in the Project). The reviewer's full account: `docs/REVIEW.md`, "Round 11".
- Design notes per area: `docs/SIM-NOTES.md`, `EMPIRE-NOTES.md`, `STARS-NOTES.md`, `UI-NOTES.md`, `CONTENT-NOTES.md`, `SAVES.md`, `PIPELINE.md`.

Full Plate facts come from the project's own documents and the Round 11 review, read without changes. The two analysts' full notes (with every game surveyed, including the unverified ones) are kept with the project.
